BAB III SUBJEK DAN METODE PENELITIAN ................................. 29
3.1 Subjek Penelitian.............................................................................. 29
   3.1.1 Populasi Penelitian..................................................................... 29
      3.1.1.1 Populasi Target ................................................................ 29
      3.1.1.2 Populasi Terjangkau .......................................................... 29
   3.1.2 Sampel ....................................................................................... 29
   3.1.3 Kriteria inklusi dan eksklusi .................................................... 30
      3.1.3.1 Kriteria Inklusi ................................................................. 30
      3.1.3.2 Kriteria Eksklusi .............................................................. 30
3.2 Metode Penelitian........................................................................... 30
   3.2.1 Rancangan Penelitian ................................................................. 30
   3.2.2 Definisi Konsep Variabel ........................................................... 31
   3.2.3 Definisi Operasional .................................................................. 31
   3.2.4 Alat Ukur ................................................................................... 31
   3.2.5 Prosedur Penelitian ................................................................. 32
   3.2.6 Analisis Data ............................................................................ 34
   3.2.7 Tempat dan Waktu Penelitian .................................................. 35
      3.2.7.1 Tempat Penelitian ............................................................. 35
      3.2.7.2 Waktu Penelitian .............................................................. 35
   3.2.8 Aspek Etik Penelitian ................................................................. 36

BAB IV HASIL DAN PEMBAHASAN.................................................. 37
4.1 Hasil Penelitian ............................................................................. 37
   4.1.1 Karakteristik Responden ............................................................ 37
   4.1.2 Derajat Nyeri Kepala berdasarkan alat ukur NRS ...................... 39
   4.1.3 Gambaran derajat nyeri kepala pada pasien preeklampsia berat di RSUD Al-Ihsan dan RSAU Salamun Bandung periode Maret sampai Mei tahun 2016 berdasarkan tingkat usia, pekerjaan, paritas, tekanan darah sistol dan diastol, dan proteinurias ............................................................... 40
4.2 Pembahasan ................................................................................... 42

BAB V SIMPULAN DAN SARAN ......................................................... 46
5.1 Simpulan ....................................................................................... 46
5.2 Saran ............................................................................................ 46
