DAFTAR ISI

ABSTRAK............................................................... ABSTRACT............................................................... iii
KATA PENGANTAR.................................................. i
DAFTAR ISI.......................................................... iii
DAFTAR LAMPIRAN................................................. v
DAFTAR TABEL...................................................... vi
DAFTAR GAMBAR.................................................... vii
PENDAHULUAN...................................................... 1

BAB
I TINJAUAN PUSTAKA............................................... 4
1.1. Tanaman Nanas.................................................. 4
1.1.1. Klasifikasi Nanas............................................. 4
1.1.2. Uraian Tumbuhan............................................. 4
1.1.3. Khasiat........................................................ 5
1.1.4. Komposisi..................................................... 6
1.2. Kulit............................................................... 6
1.2.1. Fungsi Kulit.................................................. 6
1.2.2. Anatomi Fisiologis Kulit................................. 8
1.3. Krim............................................................. 10
1.3.1. Faktor-faktor yang mempengaruhi sediaan krim.......... 11
1.3.2. Komposisi krim.............................................. 12
1.3.3. Surfactant.................................................... 14
1.3.4. Pembuatan krim............................................. 16
1.4. Data preformulasi.............................................. 16
1.4.1. Data preformulasi krim.................................... 16
1.5. Pioderma....................................................... 20
1.5.1. Faktor penyebab pioderma............................... 20
1.5.2. Klasifikasi pioderma....................................... 21
1.5.3. Bentuk pioderma........................................... 21
1.6. Klasifikasi Staphylococcus aureus.......................... 24

II METODOLOGI PENELITIAN...................................... 26

III BAHAN DAN ALAT................................................. 28

IV PROSEDUR PENELITIAN......................................... 29
4.1. Pengumpulan Bahan dan Determinasi Tanaman............... 29
4.2. Persiapan Bahan............................................... 29
4.3. Pemeriksaan karakteristik Mutu serbuk ekstrak .......... 29
4.3.1. Penetapan kadar abu total................................ 29
4.3.2. Parameter kadar abu tidak larut asam.................... 30
4.3.3. Kadar sari larut air........................................ 30

Halaman
4.3.4. Kadar sari larut etanol ................................................. 31
4.4. Penapisan fitokimia ......................................................... 31
4.4.1. Senyawa polifenolat .................................................. 31
4.4.2. Flavonoid ................................................................. 31
4.4.3. Tanin ......................................................................... 32
4.4.4. Kuinon ..................................................................... 32
4.4.5. Triterpenoid dan Steroid ............................................. 32
4.4.6. Saponin ................................................................. 32
4.4.7. Alkaloid ................................................................. 33
4.5. Prosedur Penentuan Aktivitas Antibakteri ......................... 33
4.6. Formulasi Krim Serbuk Ekstrak Buah Nanas ............... 34
4.6.1. Metode pembuatan krim ........................................... 34
4.7. Evaluasi Sediaan .......................................................... 35
4.7.1. Pengujian organoleptik ............................................. 35
4.7.2. Homogenitas ........................................................... 35
4.7.3. Pengukuran pH sediaan ........................................... 35
4.7.4. Pengukuran viskositas sediaan ................................ 35
4.7.5. Uji aktivitas antibakteri sediaan krim ................. 36
4.7.6. Uji sentrifugasi ....................................................... 36
4.7.7. Uji freeze thaw ....................................................... 36
4.7.8. Uji tipe krim .......................................................... 36

V HASIL DAN PEMBAHASAN ........................................... 38
VI KESIMPULAN DAN SARAN ........................................ 48
6.1. Kesimpulan ............................................................... 48
6.2. Saran ................................................................. 48
DAFTAR PUSTAKA ................................................................. 49
