LEMBAR PENGESAHAN .............................................. iv
MOTTO ........................................................................ iv
LEMBAR PERSEMBAHAN ................................................ iv
UCAPAN TERIMAKASIH ................................................ iv
SARI ........................................................................... iv
ABSTRACT .................................................................... iv
KATA PENGANTAR .............................................................. i
DAFTAR ISI ........................................................................ iv
DAFTAR TABEL ...................................................................... vi
DAFTAR GAMBAR .................................................................... vii
DAFTAR LAMPIRAN ............................................................... viii

BAB I PENDAHULUAN ............................................................ 1
  1.1 Latar Belakang ................................................................. 1
  1.2 Perumusan Masalah ....................................................... 2
  1.3 Maksud dan Tujuan Penelitian ....................................... 2
  1.4 Ruang Lingkup Penelitian ............................................. 2
  1.5 Anggapan Dasar ............................................................ 3
  1.6 Metodologi Penelitian .................................................. 3
  1.7 Sistematika Penulisan ................................................ 6

BAB II TINJAUAN UMUM ....................................................... 7
  2.1 Keadaan Geografis PT. Winner Prima Sekata ................. 7
    2.1.1 Lokasi Penambangan ......................................... 7
    2.1.2 Kesampaian Daerah Lokasi Penambangan .......... 10
  2.2 Iklim ........................................................................... 10
  2.3 Tataguna Lahan .......................................................... 12
  2.4 Flora dan Fauna .......................................................... 12
  2.5 Kondisi Morfologi ....................................................... 14
    2.5.1 Satuan Morfologi Daratan ............................... 15
    2.5.2 Satuan Morfologi Berelief Sedang .................... 15
    2.5.3 Satuan Morfologi Berelief Kasar ....................... 15
  2.6 Keadaan Geologi ......................................................... 16
    2.6.1 Geologi Regional ................................................ 16
    2.6.2 Struktur dan Tektonika ..................................... 19
    2.6.3 Litologi .............................................................. 20
    2.6.4 Kondisi Singkapan Permukaan ....................... 20

BAB III LANDASAN TEORI .................................................... 23
  3.1 Penentuan dan Pemilihan Pit Potensial ....................... 23
  3.2 Batas Penambangan (Pit Limit) ................................. 27
  3.3 Konsep Nisbah Kupas (Stripping Ratio) ...................... 27
  3.4 Kemantapan Lereng .................................................... 30
  3.5 Perancangan Tambang (Mine Design) ....................... 32
    3.5.1 Parameter Perancangan Tambang .................. 33
BAB IV PENGUMPULAN DAN PENGOLAHAN DATA ................................. 42
4.1 Pengumpulan Data ........................................................................ 42
4.1.1 Data Topografi ........................................................................ 43
4.1.2 Data Hasil Pemboran Eksplorasi ............................................. 44
4.2 Pengolahan Data ........................................................................... 46
4.2.1 Pembuatan Peta Pemboran ..................................................... 46
4.2.2 Pembuatan Peta Kontur Seam Batubara .................................. 48
4.3 Overlay Antara Topografi dan Kontur Seam Batubara ................. 50
4.4 Model Blok Penambangan .......................................................... 50
4.4.1 Solidasi Blok Penambangan ................................................... 54
4.4.2 Perhitungan Tonase Batubara dan Volume OB ................. 54
4.4.3 Rancangan Reserve Graphics Penambangan ......................... 57
4.5 Perhitungan BESR (Break Even Stripping Ratio) ......................... 59
4.6 Penentuan Polygon Pit Limit Pada Rancangan PIT II .................. 61
4.7 Rancangan (Design) Berdasarkan Nisbah Kupas Ekonomis ......... 63
4.7.1 Rancangan Desain Lereng Tambang ........................................ 63
4.7.2 Rancangan Ramp (Road Access Mining Pit) ......................... 64
4.8 Cadangan Tertambang .............................................................. 64
4.9 Rencana Produksi ........................................................................ 67
4.10 Umur Tambang ........................................................................... 67
4.11 Pentahapan Tambang ................................................................ 68

BAB V PEMBAHASAN ........................................................................ 72
5.1 Optimasi Blok Penambangan ....................................................... 72
5.2 Penentuan Pit Potensial ............................................................... 72
5.3 Rancangan Reserve Graphics ....................................................... 74
5.4 Kondisi Geoteknik ....................................................................... 76
5.5 Stripping Ratio Ekonomis ............................................................ 76
5.6 Desain Akhir Tambang ............................................................... 77
5.6 Cadangan Tertambang (Mineable Reserve) ................................. 79
5.7 Rencana Produksi ........................................................................ 79
5.8 Umur Tambang ............................................................................ 79
5.9 Pentahapan Tambang .................................................................. 80

BAB VI KESIMPULUAN ........................................................................ 81
6.1 Kesimpulan .................................................................................. 81
6.2 Saran ............................................................................................ 82
